# Cancer is curable

(By B.L. Varma)

GONDIA, Nov. 9: In the world of medicine today, the most dreaded term is Cancer. Many scientific researches are taking place to fight this deadly disease. Though physicians have successfully fought and cured diseases like cholera, typhoid, T.B., Rabies, etc., but the most terrible disease in the world today remains the Cancer.

Doctors and others working on cancer have different views regarding the cause of cancer. In most of the cases, if a patient has reached the 3rd or 4th stage, then death is inevitable. Doctors leave such patients at the mercy of God.

Since modern science as well as civilisation stands helpless in the face of the terror of cancer, one Mr. Nandlal Tiwari, running a medical shop at Durgachowk Gondia (Maharashtra), is the first person to untie the knot by picking up the right combination of various Herbs which gives a right treatment to this dreaded disease. Mr. Tiwari started working on cancer long ago while he was assistant manager at Assam and Darjeeling Tea Gardens. It was Mr. Tiwari's hobby to go for walks in the forests and hills every day and try to find out herbs. He came into contact with some old persons of the local tribes in this connection and got valuable information about the needed herbs and at last he was able to pick up the right herbs and other combinations.

He continued his research and discovery for about 20 years and thereafter, he

## SE Rlymen's Congress

TUMSAR ROAD, Nov. 9: — Tumsar Road branch of the South Eastern Railwaymen's Congress paid homage to late Mrs. Indira Gandhi at a condolence meeting. All members of the Union were present at the meeting. A telegram was sent to the Prime Minister Mr. Rajiv Gandhi.

was able to find out the required thing. To be on more safe side and to see the effects of his new discovery on human body he tried that medicine on himself and after being dead sure of its harmlessness he started giving the same to such persons who have no means to fight this dreaded disease without any care of monetary returns. He got miraculous results from these treatments and it gave him further inspirations to work more and more in this field.

A number of Cancer patients whose days were numbered breathed a new life after taking this medicine from Shri Nandlal Tiwari. He got wonderful results and succeeded in many cases and they are certainly a living proof of the achievements of Ayurved in the hands of Shri Tiwari and now it can be said that Cancer is no more a terror to be afraid of.

There are so many cases which have been treated. Mr. Tiwari has written to the President and Prime Minister of India and so many Chief Ministers of the State and the Research Units to seek the Government's help so that his whole process of treatment undergoes a scientific laboratory analysis. He wants his formula to be registered with the government or some other authorised agency so that he may get full credit for his hard labour and long research work.

It is found that Cancer patients emit foul smell in 3rd and 4th stages. Mr. Tiwari can get rid of such bad smell within a period of 15 to 20 days. Similarly, the cancer is detected only in 2nd stage and there is no media at present to detect the cancer in its first stage but Shri Tiwari has claimed that it is possible to detect cancer in first stage by administering his herbal medicine.

Mr. Tiwari has so far obtained 60 to 70% results of his medicine. His line of treatment does not embody any physical check-up of the patient. He administered oral doses only.

His remarkable success in treating cancer patients is certainly a noble service to mankind. It is very shortly going to be a milestone in the field of Ayurvedic medicine. It is suggested that all possible government help should be provided to Shri Tiwari so that his discovery of such wonderful herbal medicine is recognised and utilised for the elimination of the dreaded disease of Cancer.
